REMARKS

Entry of the present amendment to the specification is requested prior to the payment of the Issue Fee.

The present amendment revises the specification of the present application to properly note the related data. In particular, the present amendment supplements the original submission of the related data in the specification, as submitted in the Response Under 37 C.F.R. §1.111, filed on December 31, 2002, to indicate that the present application is a divisional of U.S. Application No. 09/736,441, which is a reissue of U.S. Patent 6,075,576, which is a 371 of PCT/JP97/02319, filed on July 3, 1997.

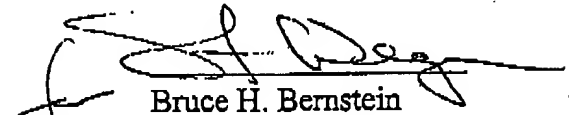

Applicants submit that the present amendment is needed for proper disclosure, and that the amendment requires no substantial amount of additional work on the part of the U.S. Patent and Trademark Office. Accordingly, entry of the amendment is respectfully requested.

Further, Applicants note that the revised rules for making amendments to an application do not apply to reissue applications. Accordingly, Applicants herewith submit the revision to the specification with the use of under-lining to identify that which differs from the issued patent.
